## WELCOME TO COREL KPT COLLECTION

Welcome to Corel® KPT® Collection, the revolutionary KPT series of filters designed to help you create dazzling and unique effects.

### THE COREL KPT COLLECTION FILTERS

Corel KPT Collection includes 24 extraordinary filters that produce dazzling and unique effects for print and the Web.

#### KPT FIBEROPTIX

The KPT® FiberOptix™ filter lets you create realistic hair, fur, rain showers, and more. You can control the length, color, and tint of each fiber you create on a source image. Using a mask, you can create fibers in specific shapes; for example, you can create hair that grows as text.

#### KPT FRAX4D

The KPT® Frax4D™ filter lets you create 3-D sculptures out of fractal space. You can wrap these sculptures with any environment map. You can also rotate sculptures and render them as images.

#### KPT BLURRRR

The KPT® Blurrrr™ filter lets you manipulate the pixels in a source image to soften, smooth, and blend its edges and colors.

### **KPT EQUALIZER**

The KPT® Equalizer™ filter lets you use a variety of filters to add interesting effects to images by manipulating their frequencies; for example, you can sharpen or blur images.

### **KPT FRAXPLORER**

The KPT® FraxPlorer™ filter lets you create an infinite variety of fractal patterns. You can also customize fractals using various color, contrast, distortion, and zooming tools.

### **KPT SHAPESHIFTER**

The KPT® ShapeShifter™ filter lets you apply interesting effects to objects; for example, you can apply bevels, graphics and text layers, and dimensions. You can also use environment and bump maps to achieve reflections and surface texture. You can create multiple objects at once; for example, by loading a mask with the shapes of each letter in a font set, you can turn the shapes into 3-D buttons for a Web site.

### **KPT NOIZE**

The KPT® Noize™ filter lets you explore a variety of mathematically generated noise patterns that can be used as textures, patterns, or noise maps. You can select a noise family, mutate it to explore its variations, and apply it to a source image.

### **KPT GEL**

The KPT® Gel™ filter lets you use paint tools to create 3-D images, text treatments, and objects such as buttons and borders. You can use lighting effects, tinting, and transparency to control the qualities of effects.

### **KPT GOO**

The KPT® Goo filter lets you create effects that simulate the look of gelatin finger-painted on a source image. You can smear, splatter, twirl, pinch, or bulge images to create unique results. You can also use animation controls to save effects as movies.

### **KPT LENSFLARE**

The KPT® LensFlare™ filter lets you apply interesting effects on a source image to simulate the photographic reflections created by a bright light shining on a camera lens. For example, you can create glows, halos, and streaks of light.

### **KPT MATERIALIZER**

The KPT® Materializer™ filter lets you create complex textures, stunning backgrounds, and dazzling text treatments on source images. You can import bump maps and scale, pan, and rotate them to achieve interesting effects. You can also use lighting controls to manipulate surface textures.

### **KPT PROJECTOR**

The KPT® Projector™ filter lets you use warping effects to create 2-D perspective distortions and 3-D transformations on source images. You can also create infinite planar tiling at any angle, and you can use anisotropic light filtering.

### **KPT REACTION**

The KPT® Reaction™ filter lets you use patterns and diffusion options to create realistic simulations of organic textures, such as the growth pattern of coral or the stripes on a zebra.

### **KPT TURBULENCE**

The KPT® Turbulence™ filter lets you create waves on a surface image. As the waves distort the image, they become animated and fluid. You can apply color blends to the waves. You can also take a snapshot of the waves that you can apply to a source image, or you can save the waves in motion as a movie.

### **KPT RADWARP**

The KPT® RadWarp™ filter lets you use a simulated camera effect called barrel distortion to warp the edges of images. You can also correct barrel distortion on images.

### **KPT CHANNEL SURFER**

KPT® Channel Surfer™ lets you apply effects to individual channels in an image. You can blur or sharpen a channel, or adjust its contrast or value. You can adjust the amount and transparency of the effect, and control how the effect blends with the source image.

### **KPT FLUID**

KPT® Fluid™ lets you manipulate images by applying liquid-like transformations and distortions that simulate dragging a brush across a wet surface. You can control the effect by setting the thickness of the fluid as well as the brush size and velocity. You can use various preview techniques to fine tune the effect, and choose to save the fluid in motion as a movie.

### **KPT FRAXFLAME II**

KPT® FraxFlame II™ lets you explore and mutate an infinite variety of flame fractals. You can also customize fractals with various color, contrast, and distortion techniques.

### **KPT GRADIENT LAB**

KPT® Gradient Lab™ lets you create complex color blends with various levels of transparency. You can also customize gradients with interesting shapes, styles, and pixel distortions.

### **KPT HYPER TILING**

KPT® Hyper Tiling™ lets you create and save intricate tiling effects by reducing the source image to create a tile. The tile is then repeated to create a hyper tiling effect. You can create different blends between the source image and the effect, and change the perceived distance from the effect. You can also change the depth, transparency, position, and size, of the effect, and rotate it through space.

### **KPT INK DROPPER**

KPT® Ink Dropper™ lets you create the effect of dropping colored liquid (ink) on glass, canvas, or into another liquid. You can also create your own background images. You can choose the color of the liquid, and change its intensity and transparency. You can also change the size of the individual drops, and the rate at which they disperse on the surface.

## **KPT LIGHTNING**

KPT® Lightning™ lets you create powerful, customized lightning bolts. You can control every aspect of a lightning bolt, from setting its length and color, to determining its path and how much it zags and wanders. The lightning effect can then be realistically integrated into your source image using one of several blend modes.

## **KTP PYRAMID PAINT**

KPT® Pyramid Paint™ uses the Lab color mode to let you transform source images into effects that resemble paintings, and perform various color and contrast adjustments to them.

## **KPT SCATTER**

KPT® Scatter™ is a 2-D particle system that lets you scatter a range of particles over a source image. You can scatter large masses of particles over an effect, or create densely packed particles to emulate intricate effects such as paint strokes or mosaics. You can also create special effects based on the way particles interact with the properties of a source image.

## **ABOUT THE USER GUIDE**

The Corel KPT Collection User Guide assumes you are already familiar with basic Mac OS® and Windows® concepts — menus, dialog boxes, and mouse operations, such as clicking and dragging. If you need more information on these subjects, or about the Apple® Finder™ or the Windows desktop, refer to the Mac OS® User Manual or the Microsoft® Windows® User Guide, respectively.

## **USER GUIDE CONVENTIONS**

The Corel KPT Collection User Guide is for both Mac OS and Windows platforms. By convention, Mac OS commands precede Windows commands in the text. For example, Command/Ctrl + I, is equivalent to the Mac OS Command + I and the Windows Ctrl + I, and indicates that you must hold down the Command or Ctrl key, and press I. The term “folder” refers to directories as well as folders. The Corel KPT Collection interface for Mac OS and Windows platforms is identical, unless otherwise specified.

## **ABOUT COREL CORPORATION**

Founded in 1985, Corel Corporation ([www.corel.com](http://www.corel.com)) is a leading technology company specializing in content creation tools, business process management and XML-enabled enterprise solutions. The company’s goal is to give consumers and enterprise customers the ability to create, exchange and instantly interact with visual content that is always relevant, accurate and available. With its headquarters in Ottawa, Canada, Corel’s common stock trades on the Nasdaq Stock Market under the symbol CORL and on the Toronto Stock Exchange under the symbol COR.

## **COREL CUSTOMER SUPPORT SERVICES**

Corel Customer Support Services can provide you with prompt and accurate information about product features, specifications, pricing, availability, services and technical support.

## **ONLINE SUPPORT SERVICES**

For information about online support services, visit [www.corel.com](http://www.corel.com). Please note, some of the services are available only in English.

## TELEPHONE SUPPORT SERVICES

Web services	Description
Corel® Knowledge Base	Allows you to read, print and download documents that contain answers to many technical questions.
Newsgroups (peer-to-peer forums)	Allow you to exchange information, tips and techniques with other users of Corel products.
Downloads	Allow you to download product patches, updates and trial versions.

For detailed information regarding telephone support services, please visit [www.corel.com](http://www.corel.com).

Live telephone support services are available for all Corel products from warranty support (30 days) to fee-based Priority and Premium Services. OEM, “white box,” jewel case (CD only), trial, and Academic versions of Corel products are eligible for fee-based support services only.

### NORTH AMERICA

For pricing, purchasing, or general inquiries about Corel products, you can call Customer Service toll-free at 1-800-772-6735.

To speak directly to a technician please dial 1-613-274-0500. The hours of operation are 8:30 a.m. to 7:30 p.m., Monday to Friday, Eastern Standard Time (EST).

### OUTSIDE NORTH AMERICA

For pricing, purchasing, or general inquiries about Corel products, you can call Customer Service toll-free at 1-800-267-35127. If the country you are calling from is listed below, please call the corresponding number.

Please note that these numbers may change as we adapt our services to fit user needs. Check the international support numbers page at [www.corel.com](http://www.corel.com) for the most up to date contact details. Contact Customer Service for pricing, purchasing, general inquiries, or replacement CDs. Contact Technical Support Services should you require technical assistance operating your Corel software.

## GETTING STARTED WITH COREL KPT COLLECTION

Corel KPT Collection is an extraordinary collection of filters that produce dazzling and unique effects for print and the Web. Whether you are a professional designer, artist, Web author, or hobbyist, the Corel KPT Collection filters will help you take your work to a new creative level, and enhance your productivity.

### INSTALLING COREL KPT COLLECTION

You can install Corel KPT Collection in host applications compatible with Mac OS and Windows.

#### TO INSTALL COREL KPT COLLECTION IN MAC OS

- 1 Insert the Corel KPT Collection CD into the computer's CD drive.
- 2 Browse to the **Corel KPT Collection** folder.
- 3 Double-click the **Corel KPT Collection installer** icon.
- 4 Follow the instructions on your screen.

#### TO INSTALL COREL KPT COLLECTION IN WINDOWS

- 1 Insert the **Corel KPT Collection** CD into the computer's CD drive.
- 2 Click **Install**.
- 3 Follow the instructions on your screen.

## STARTING AND QUITTING FILTERS

You can access a Corel KPT Collection filter from the host application. You can quit a Corel KPT Collection filter in two ways. You can quit a filter and apply the effect to the source image in the host application. You can also quit a filter without applying the effect to the source image in the host application.

### TO ACCESS A FILTER

- ▷ Do one of the following:
  - In Adobe® Photoshop®, click **Filters ▶ Corel KPT Collection**, and click a filter.
  - In Painter, click **Effects ▶ Corel KPT Collection**, and click a filter.
  - In Corel PHOTO-PAINT, click **Effects ▶ Corel KPT Collection**, and click a filter.
  - In Bryce®, click a flyout arrow in the **Pictures** dialog box in **Picture editor**, click **Corel KPT Collection**, and click a filter.

Note If you want to access a Corel KPT Collection filter in Bryce for the first time, you must first click a flyout arrow in the **Pictures** dialog box, click **Select plug-ins folder**, choose the folder where Corel KPT Collection is installed, and click **Choose/OK**.

### TO QUIT A FILTER

- ▷ Click one of the following buttons:
  - **OK** — to quit a filter and apply the effect
  - **Cancel** — to quit a filter without applying the effect

## USING PANELS AND SLIDERS

You can set the style in which panels display. You can also move sliders.

### TO SET A PANEL DISPLAY STYLE

- 1 Click the filter name.
- 2 From the **Filter options** list box, choose one of the following styles:
  - **Panel auto popup** — to automatically expand panels as you move the pointer over them
  - **Panel manual popup** — to manually expand panels by clicking the **Cycler** button in the title bar
  - **Panel solo mode** — to expand the current panel and automatically collapse those not in use

Tip

In **Panel auto popup** mode, sliders expand to display a panel with additional controls you can use to adjust slider settings incrementally, and view previous slider settings (indicated by the location of the gray arrow).

In **Panel manual popup** mode, you can expand a panel by clicking the **Cycler** button in the right corner of its title bar.

In **Panel solo mode**, you can collapse an expanded panel by double-clicking its title bar.

## TO MOVE A SLIDER

- Drag the black slider arrow.

## PREVIEWING FILTER EFFECTS

The **Preview** window lets you dynamically view the results of your work. You can apply a background to the **Preview** window. You can also move and size the **Preview** window.

## TO APPLY A BACKGROUND TO THE PREVIEW WINDOW

- Click the flyout arrow in the **Preview** window, and choose one of the following options from the **Preview options** list box:
  - **Preview against black** — to display an effect against a solid black background
  - **Preview against white** — to display an effect against a solid white background
  - **Preview against checkerboard** — to display an effect against a background of gray squares
  - **Preview against dark checkerboard** — to display an effect against a background of dark gray squares
  - **Preview against gradient** — to display an effect against a grayscale gradient background

Note The effect only displays against the background while it is in the **Preview** window. The background is not applied to the source image in the host application, and does not impact the final render of the effect.

## TO MOVE THE PREVIEW WINDOW

- Drag the title bar.

## TO SIZE THE PREVIEW WINDOW

- 1 Click the flyout arrow in the **Preview** window.
- 2 From the **Preview options** list box, choose one of the following **Preview** window sizes:
  - **Small preview**
  - **Medium preview**
  - **Large preview**

## CUSTOMIZING THE WORKSPACE

You can apply a fun icon style to the common workspace. If the KPT workspace is smaller than the resolution of your screen, you can also display or hide common workspace controls.

## TO APPLY A FUN ICON STYLE TO THE COMMON WORKSPACE

- 1 Click the **KPT** logo.
- 2 Choose **Smileys!** from the **Global options** list box.

## TO DISPLAY OR HIDE COMMON WORKSPACE CONTROLS

- 1 Click the **KPT** logo.
- 2 Choose **Black out screen** from the **Global options** list box.

## STORING WORKSPACE AND PANEL SETTINGS

Storing workspace settings lets you save different workspace layouts. For example, you can arrange all panels on one side of the workspace and enlarge the **Preview** window, and then save this layout for later use.

Storing panel settings lets you save and compare different versions of a filter effect.

The workspace and panel settings you save are retained from one session to another, so you can use them again and again. When you no longer need stored workspace and panel settings, you can clear them. You can also restore default workspace or panel settings.

#### TO STORE WORKSPACE SETTINGS

- Click a gray memory dot in the **Layout** panel.

Empty memory dots display gray, full

memory dots display green, and memory

Note

dots currently in use display yellow.

#### TO STORE PANEL SETTINGS

- Click a gray memory dot in the **Recall** panel.

#### TO USE STORED WORKSPACE OR PANEL SETTINGS

- Click a green memory dot in one of the following panels:
  - **Layout** — to use stored workspace settings
  - **Recall** — to use stored panel settings

#### TO CLEAR STORED WORKSPACE OR PANEL SETTINGS

- Hold down **Option/Alt**, and click the corresponding green memory dot in one of the following panels:
  - **Layout** — to clear stored workspace settings
  - **Recall** — to clear stored panel settings

#### TO RESTORE DEFAULT WORKSPACE OR PANEL SETTINGS

- Click the memory dot in the center of one of the following panels:
  - **Layout** — to restore default workspace settings
  - **Recall** — to restore default panel settings

#### Working with presets

Some Corel KPT Collection filters provide you with preset effects. You can load a preset effect. You can also save an effect you create as a preset. You can create multiple presets categories in which to organize the presets you store.

You can import and export presets.

#### TO LOAD A PRESET

- 1 Click the **Presets** button.
- 2 Double-click a preset thumbnail in the **Presets library** panel.

If the preset is stored in a category, you must first choose the category from the middle-left tile of the **Presets library** panel, then double-click a preset thumbnail.

You can preview a preset by

single-clicking a preset thumbnail. A

Note

larger version of the preset thumbnail

displays in the upper-left tile of the

**Presets library** panel.

#### TO SAVE AN EFFECT AS A PRESET

- 1 Click the **Presets** button.

- 2 Choose a category from the middle-left tile of the **Presets library** panel.
- 3 Click **Add preset**.

A preset thumbnail displays in the **Presets library** panel.

You can also delete a preset from a category by clicking a preset thumbnail, and clicking **Delete preset**.

Note

#### TO CREATE A PRESETS CATEGORY

- 1 Click the **Presets** button.
- 2 Click the flyout arrow in the **Presets library** panel, and click **Create new category**.
- 3 A text box displays in the middle-left tile of the **Presets library** panel.
- 4 Type a name.
- 5 Press **Return/Enter**.

Each category can store up to 24 presets.

#### TO IMPORT A PRESET

- 1 Click the **Presets** button.
- 2 Click **Import** in the **Presets library** panel.  
If you want to import a preset to a specific category, you must first choose the category from the middle-left tile of the **Presets library** panel, and then click **Import**.
- 3 Choose the folder where the file is stored in the **From** dialog box.
- 4 Click the file.
- 5 Click **Open**.

The preset displays as a thumbnail in the **Presets library** panel.

#### TO EXPORT A PRESET

- 1 Click the **Presets** button.
- 2 Choose a category from the middle-left tile of the **Presets library** panel.
- 3 Click a preset thumbnail.
- 4 Click **Export**.
- 5 In the **Save as** dialog box, type a filename in the **Save as** box.
- 6 In the **Where** box, choose the folder where you want to export the file.
- 7 Click **Save**.

# KPT RADWARP

## WHAT'S IN THIS SECTION:

- Overview .....13
- Setting Warp Parameters .....13
- Setting Warp Alpha Controls .....13
- Setting Warp Beta Controls .....14
- Adjusting Warp Center .....14
- Rotating your Image .....15

## OVERVIEW

KPT RadWarp simulates a camera effect known as a barrel distortion. The distortion causes the edges of your image to become warped as if you were looking through a “fish-eyed” lens. This filter can be used both to correct a barrel distortion and to create it.

**ABC**      **ABC**

*Different X Center values.*

### SETTING WARP PARAMETERS

The KPT RadWarp effect is created by adding mathematically-calculated distortions to your image. The two parameters control variables in equations used to calculate the effect. All you have to know to use this effect is that adjusting the parameter values creates a completely different distortion effect.

*The Warp Parameters panel.*

### SETTING WARP ALPHA CONTROLS

The Alpha slider controls how much of an alpha curve is added to your image. The net result is that you should continue adjusting this control until you get the effect you want.

*An example of a low Alpha setting.*

### **SETTING WARP BETA CONTROLS**

The Beta slider controls how much of a beta curve is added to your image. Again, experimentation is the key to using this filter effectively. Adjust the position of the slider until you get the effect you want.

*An example of a high Beta setting.*

### **ADJUSTING WARP CENTER**

The KPT RadWarp filter can reposition the center of your image so that the center of the warping effect appears on different parts of your image. By trying different center positions, you can add a kind of perspective warp to the image.

### Setting Horizontal Center

The X Center slider lets you control the horizontal center of the warping effect.

*Different X Center values.*

### Setting Vertical Center

The Y Center slider lets you position the center of the effect vertically.

*Different Y Center settings.*

### ROTATING YOUR IMAGE

The Rotation slider lets you rotate the image in real-time. The slider sets the angle in degrees.
